

ÖZGE BİLİCİ

Software Engineer

+90 538 057 2273 | ozgebilici40@gmail.com | linkedin.com/in/özge-bilici | github.com/ozgebilici | Zonguldak, Türkiye

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in backend development, machine learning, and real-time systems. Completed an internship at Flovo Inc., where I built multi-layered ASP.NET Core MVC applications using clean design patterns and microservices architectures. Contributed to TÜBİTAK 2209-A funded AI research on global hunger risk prediction, working with large-scale, multi-source datasets. Experienced in developing data pipelines, building computer vision systems, and working in Linux-based development environments. Eager to contribute technical depth and an ownership-driven mindset to an innovative engineering team.

WORK EXPERIENCE

Software Development Intern | Flovo Inc.

Istanbul, Türkiye • Jul 2025 – Aug 2025

- Developed multi-layered ASP.NET Core MVC web applications applying clean design patterns, including Repository Pattern and Dependency Injection.
- Implemented JWT and ASP.NET Identity-based authentication and authorization infrastructure.
- Designed microservices architecture using Docker and MongoDB; built order, cart, and shipment tracking modules.
- Integrated Entity Framework for database operations and contributed to scalable backend component design.

Software Developer | APIG TECH — İTÜ Student Project Team

Istanbul, Türkiye (Remote) • 2024

- Contributed to the development of a computer vision-based image processing pipeline as part of the Agile Hunter project at Istanbul Technical University's student technology team.
- Worked in a Linux-based development environment, supporting image processing modules and backend integration within a cross-functional team.

EDUCATION

B.Sc. Software Engineering | Aksaray University

Aksaray, Türkiye • Sep 2022 – Jun 2026

GPA: 3.21/4.00

SKILLS & COMPETENCIES

Languages: Python, C#, C, SQL, JavaScript, PHP, HTML, CSS, Flutter

Backend: ASP.NET Core MVC, REST APIs, Entity Framework, JWT, Dependency Injection, Repository Pattern

Microservices & Cloud: Docker, MongoDB, Google Cloud, Firebase

Data & ML: TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Apache Airflow

Databases: PostgreSQL, SQL Server, MongoDB, Firebase

Tools & Architecture: Git, GitHub, Docker, SOLID Principles

TECHNOLOGY PROJECTS

TÜBİTAK 2209-A — Global Hunger Risk Mapping & Early Warning System

Capstone Project • 2025 – 2026

- Conducted university-funded AI research on global hunger risk prediction using a hybrid machine learning architecture; achieved 88% F1-score.
- Built ETL pipelines integrating large-scale, multi-source datasets — including NASA GPM, FAO, ACLED/UNHCR, and World Bank data — and designed a PostgreSQL schema with ML-based risk scoring.
- Automated data workflows using Apache Airflow and developed geospatial visualization dashboards.

BOZGUN — Color-Based Autonomous Target Tracking System

Aksaray University Project Fair • 2024

- Developed real-time image processing algorithms using Python and OpenCV with HSV-based color detection and coordinate mapping.

- Controlled a pan-tilt mechanism via Arduino and serial communication; presented at Aksaray University Project Fair.

Alzheimer Cognitive Training Platform

2025

- Developed an interactive platform for Alzheimer's patients featuring cognitive exercises, progress analytics, and doctor monitoring functionality.
- Built with Python, TensorFlow, Firebase, and Flutter; designed with a patient-centric UX approach.

Dijital Arınma — KVKK Data Deletion Web Platform

- Built a platform enabling users to identify their digital accounts and submit KVKK-compliant data deletion requests.
- Developed with ASP.NET Core MVC, MySQL, and Docker with account management and progress tracking modules.

CERTIFICATIONS & ACHIEVEMENTS

- AR-GE Proje Pazarı Participant — Aksaray University II. AR-GE Project Market (2025)
- Arduino Programming — Aksaray Science Center (2023)
- Digital Literacy — Habitat Association & Microsoft Türkiye (2022)
- Business Club Training — İŞKUR (2022)
- Computer Operations — MEB Çaycuma Public Education Center (2019)
